**Vagotomy**

Therefore, moderate lifestyle, therapy of bacterial infections, Paricalcitol in adult patients with hyperparathyroidism and HMG-CoA-reductase inhibitors in adult patients with dyslipoproteinemia might contribute to a slower progression of AS and less cardiovascular events. Satisfaction with primary care physicians, health insurance, and general health status are the 3 most significant indicators of an individual's satisfaction with health care. Since that time it has been possible to demonstrate on the basis of 1200 operated cases as well as animal experiments that the new technique we introduced represents a successful, nonresecting surgical treatment of gastric and duodenal ulcers.

**English Editing and Manuscript Proofreading By Enago**

Treatment modalities, including the multiple mechanisms of action of ursodeoxycholate were finally discussed.
