Program on Ancient Technologies and Archaeological Material..

It works by sending out periodic radio waves that bounce off of the object and then measuring how long it takes that bounced signal to return. It is thought that this device was an analog computer designed to calculate astronomical positions and was used to predict lunar and solar eclipses based on Babylonian arithmetic-progression cycles. Later winches were added for heavy weights.

Program on Ancient Technologies and Archaeological Material..

Brody eds , Encyclopedia of the Ancient Greek World. A program of typological study and compositional analysis revealed forms shared between the sites but evidence of on-site metallurgy is supported only at Lamanai.

Let's learn about ancient technology

All of our modern things, however, are based on older technologies. Naama Yahalom-Mack, an archaeometallurgist and senior lecturer in the Department of Biblical Archaeology, and is open to conduct a wide range of research with the cooperation of faculty, students and other researchers. Radar can detect moving objects, like airplanes.

Archaeological Approaches to Technology: Miller, Heather Margaret

Excellent examples of these technologies include the drainage system found in the west coast, which featured an unusual outlet structure that allowed self-cleaning of the drainage outlet. Students will collaborate with the to explore Roman construction technologies, with an emphasis on the Privernum archaeological area.
