Seated directly alongside the Amstel River, in a quiet country berg, we caught up on the past few years. After an hour-and-a-half or so we covered the 16 miles to civilization and returned back to camp via the Interstate.

**Pyramid Point Trail**

Additionally, a field survey was carried out to map the spatial variation in capillary fringe depth across the sand flat. The simulations provide the first complete description of sand dune formation and long-term evolution.

**sand dunes occur: Topics by Science.gov**

Here, we extend the linear stability analysis of a flat sand of bed done in two dimensions for a unidirectional flow to three dimensions and multidirectional flow regimes. The first features to become covered by frost were the sand dunes that surround the north polar ice cap. Boys—
