## Liver Pathology

Relative contraindications include lesions isolated to segments VII and VIII, multiple or bilateral lesions, and lesions located in proximity to the major hepatic veins, the inferior vena cava, or the hepatic hilum. Ask a pediatric pathologist to show you a sample.

## Pathology Outlines

Plus, the risk of hepatotoxicity from herbal concoctions is well-known.

## **Johns Hopkins Pathology: Division of Gastrointestinal and Liver Pathology**

Image Title Image description: This is just placeholder text. LD is an enzyme found in the liver. This is the future of surgical pathology -- enjoy it.

## **LIVER AND BILIARY DISEASE**

Image Title Image description: This is just placeholder text.

## **Pathology Outlines**

It's a radiologist's curiosity in which gallstones are more likely to form.
