Profile and moments of the proton magnetic resonance line in β

Compared with Pd nanocubes, PdH 0.

NMR study of the plutonium hydride system (Journal Article)

Copyright 2018, Wiley-VCH; adapted with permission from ref. Synthesis and biomedical applications of multifunctional nanoparticles. Different line shapes and shifts are found for the tetrahedral and octahedral protons, which indicate a different bound state for the hydrogen ions.

Effects of tunnelling in proton magnetic resonance transient responses in β

Huang X, Tang S, Mu X, Dai Y, Chen G, Zhou Z. More importantly, effective photothermal ablation of tumors could be achieved upon 808 nm laser irradiation at a power density of only 0.

Palladium

E Degradation behavior of H-Pd NSs in simulated body fluid.

NMR study of the plutonium hydride system (Journal Article)

Cancer immunotherapy using checkpoint blockade.
