There are two equal CTAs — one for residential customers and one for business owners — that use contrasting colors to draw the eye. The navigation bar at the bottom is very creative and user-friendly.

Web Page Design: A Different Multimedia

Designers use whimsical navigation to help visitors explore the place and pin locations freely as they wish. This means that those businesses whose websites are not responsive to the small screens of mobile devices are losing huge number of customers. I have a feeling this trend will not only stay but also evolve.

Multimedia Designer

Interactive multimedia defines multimedia applications that allow users to actively participate instead of just sitting by as passive recipients of information. After graduation, they may choose to work with web-based games or video games played on devices such as consoles and smartphones.
