Excerpt from Silverlight 1.0 Unleashed

This is the eBook version of the printed book. The Function for onLoad and onError Must Not be Specified as a String! Of course, both Flash and Silverlight are designed to have a quick and painless installation, so sites don't have to inconvenience users too much if they don't have the necessary software.

Silverlight 1.0 Unleashed on Apple Books

If you care about your content working on most web browsers or even just Internet Explorer and Firefox , accommodating their differences can be maddening. Instead, you must use an element called EMBED, which also happens to work in Internet Explorer and Firefox.

Microsoft Silverlight

They gave good hints on what will probably be defined as Silverlight best practices in the future.

Silverlight won't display

For clarity, you should stick to using maxFramerate if you feel the need to customize the frame rate.
